

# My ML Project

Name I, First Name I      Name II, First Name II

4/10/23

The following machine learning project focuses on...

## Table of contents

<b>Introduction</b>	<b>1</b>
<b>Data</b>	<b>1</b>
<b>Exploratory data analysis</b>	<b>2</b>
<b>Supervised learning</b>	<b>2</b>
<b>Unsupervised learning</b>	<b>2</b>
<b>Conclusion</b>	<b>2</b>

## Introduction

- Overview and Motivation
- Related Work
- Research questions

## Data

- Sources
- Description
- Wrangling/cleaning
- Spotting mistakes and missing data (could be part of EDA too)

- Listing anomalies and outliers (could be part of EDA too)

```
# Example of a code block
```

## Exploratory data analysis

- Mapping out the underlying structure
- Identifying the most important variables
- Univariate visualizations
- Multivariate visualizations
- Summary tables

## Supervised learning

- Data splitting (if a training/test set split is enough for the global analysis, at least one CV or bootstrap must be used)
- Two or more models
- Two or more scores
- Tuning of one or more hyperparameters per model
- Interpretation of the model(s)

## Unsupervised learning

- Clustering and/or dimension reduction

## Conclusion

- Brief summary of the project
- Take home message
- Limitations
- Future work?
